## 1. EXECUTIVE SUMMARY & STATUTORY PURPOSE

### 1.1 Objective of this Package

This document provides an exhaustive, litigation-ready dossier documenting:

1. **Digital Portal Verification Pathways**: The technical architecture, Unified Resource Identifiers (URIs), document Object Model (DOM) event handlers, and data parameters for retrieving automobile insurance coverage

certificates (*자동차보험 가입증명서*) and premium payment receipts (*보험료납입영수증/납입증명서*) from the online web portals of DB Insurance Co., Ltd. (`https://www.directdb.co.kr` and `https://www.idbins.com`).

2. **Forensic Proof of Digital Impracticability**: The insurmountable technical, regulatory, and legal barriers that prevent the digital retrieval of insurance records by or on behalf of deceased foreign national MAHADI MONOAR HOSSAIN via online channels.
3. **Statutory Offline Legal Demand**: The complete, authoritative Korean legal notice—*보험가입증명서 및 보험료납입영수증 발급요청서 (금융소비자보호법 제 28 조에 따른 자료열람·교부 청구)*—served by the surviving legal heirs (the parents in Bangladesh, BELAL HOSSAIN and MONOARA BEGUM) through their consularly appointed Attorney-in-Fact upon DB Insurance Co., Ltd.
4. **Enforcement Protocol**: Service procedures via Korea Post Content-Certified Mail (*내용증명*), electronic facsimile, and the statutory 8-day compliance mechanism under Financial Consumer Protection Act Article 28.

### 1.2 Legal Necessity of Formal Written Disclosure

Following the fatal single-vehicle accident on March 14, 2026 involving vehicle `28 모 1390` (Kia Morning), the deceased insured's surviving heirs require immediate physical copies of the policy certificate (*보험가입증명서*), policy clauses (*보험약관*), and premium payment receipts (*보험료납입영수증*) to enforce the statutory KRW 100,000,000 accidental death benefit under the first-party Self-Physical Accident / Automobile Bodily Injury endorsement (*자기신체사고 / 자동차상해 특별약관*).

Because domestic telecommunication lines and electronic identification certificates belonging to the deceased foreign student were extinguished or frozen post-mortem, electronic portal self-service is impossible. The surviving heirs must exercise their substantive statutory right to inspect and obtain copies of insurance records under Financial Consumer Protection Act Article 28 and Commercial Code Article 640.

## 2. DB INSURANCE DIGITAL PORTAL ARCHITECTURE & NAVIGATION FLOWS

DB Insurance operates two interconnected web portals:

- **DB Insurance Direct Portal**: `https://www.directdb.co.kr` (Optimized for online sales, direct contract management, and certificate routing).
- **DB Insurance Corporate Customer Portal**: `https://www.idbins.com` (Mainframe portal handling document generation, claim adjustment, billing, and certificate PDF rendering).

Digital certificate requests initiated on `directdb.co.kr` are routed via secure Single Sign-On (SSO) links into dedicated service controllers on `idbins.com`.

### 2.2 Client-Side Event Architecture (`directdb.co.kr`)

When a user visits the Certificate Issuance Hub (`https://www.directdb.co.kr/comm/cert/certInfoView.do`), the client interface renders ten certificate tiles. When the user selects "자동차보험 가입증명서" (Tile 2) or "보험료 납입증명서" (Tile 3), the browser executes the following client-side script:

```
// DB Insurance Direct core certificate routing logic:
function sLinkUrl(irs) {
    var openWindow = window.open("https://www.idbins.com" + irs, "_blank");
}

// Tile 2 Event Handler (Auto Coverage Certificate):
// <a href="javascript:void(0);" onclick="sLinkUrl('/FWMYCV0371.do?rUrl=/FWMYCV0373.do');" class="btn_cert">자동차보험 가입증명서</a>

// Tile 3 Event Handler (Premium Payment Certificate):
// <a href="javascript:void(0);" onclick="sLinkUrl('/FWMYCV0383.do');" class="btn_cert">보험료 납입증명서</a>

// Tile 1 Event Handler (Original Policy Schedule):
// <a href="javascript:void(0);" onclick="sLinkUrl('/FWMYCV0366.do');" class="btn_cert">보험증권</a>
```

### 2.3 Server-Side Redirection & Authentication Intercept

When the browser executes `window.open("https://www.idbins.com/FWMYCV0371.do?rUrl=/FWMYCV0373.do")`, the request hits the DB Insurance Enterprise Application Server.

5. **Session Validation Filter**: The server inspects HTTP request headers for an active, authenticated JSESSIONID / SSO token.
6. **Unauthenticated Intercept**: In the absence of an authenticated session, the server issues an HTTP 302 redirect:
   `Location: https://www.idbins.com/login/formView.do?returnUrl=/FWMYCV0371.do`

7. **Authentication Gateway Display**: The user is presented with the mandatory identity verification interface requiring Level 3/4 electronic authentication.

---

## 3. FORENSIC ANALYSIS OF DIGITAL AUTHENTICATION FAILURES FOR DECEASED FOREIGN NATIONALS

Electronic contract retrieval through `directdb.co.kr` or `idbins.com` is legally, technically, and procedurally impossible for deceased foreign student MAHADI MONOAR HOSSAIN. The specific failure modes across all available authentication mechanisms are detailed below.

| DB INSURANCE DIGITAL AUTHENTICATION GATEWAY (https://www.idbins.com/login/formView.do) | | |
|---|---|---|
| **Authentication Method** | **Technical Mechanism** | **Fatal Foreigner Death Failure Mode** |
| 1. Joint Certificate (공동인증서 / 구 공인인증서) | Hancom AnySign4PC X.509 PKI; Validated via OCSP/CRL against Korea Financial Telecomm (yessign) or SignKorea (KICA). | Foreign resident D-2 registration terminated; bank accounts frozen; certificate revoked. |
| 2. Financial Certificate (금융인증서) | KFTC YESKEY cloud vault; 6-digit PIN backed by domestic carrier phone SMS 2FA. | Cloud vault locked; SMS 2FA OTP sent to deceased's terminated Korean SIM. |
| 3. Mobile Carrier Phone 2FA (휴대폰 본인인증) | Real-name carrier identity check (SKT, KT, LGU+, MVNO) via KMC, NICE, or KCB credit rating DB. | Telecom line deactivated post-mortem; carrier DB returns subscriber cease. |
| 4. Simple Authentication (간편인증 - Kakao, PASS, Naver) | FIDO biometric push via mobile app (Kakao Pay, PASS, Naver, Toss); Real-name matched to ARC. | Latin name mismatch; deceased status blocks identity cross-check. |
| 5. Headless Web Automation (Scripted Browser Scraping) | Puppeteer, Selenium, Playwright, HTTP POST scripting. | Blocked by AnySign4PC, nProtect Netizen, and encrypted CSRF tokens. |

### 3.1 Joint Certificate (*공동인증서*) Breakdown

- **Security Architecture**: Operates via Hancom AnySign4PC PKI client. The client extracts public/private key pairs (`signCert.der`, `signPri.key`) from local storage and executes an RSA digital signature over a challenge string generated by DB Insurance.
- **Foreigner Immigration Linkage**: Under Korean electronic signature and financial surveillance regulations, joint certificates issued to foreign residents are indexed to their Alien Registration Number (`010530-7660021`). Certificate issuing authorities (KICA, Yessign, Koscom) perform continuous or periodic Online Certificate Status Protocol (OCSP) queries against the Korea Immigration Service database.

- **Post-Mortem Revocation**: Upon death, the foreign resident's D-2 stay qualification is terminated. Domestic commercial bank accounts holding certificate registration are frozen. Even if physical certificate files remain on a storage medium, any signature attempt triggers an OCSP status code of `REVOKED` or `CERTIFICATE_INVALID`.
- **Criminal Liability of Heirs**: Under Article 6 of the Electronic Financial Transactions Act (*전자금융거래법*), utilizing, transferring, or delegating digital access media belonging to another person is strictly prohibited. Attempting to forge or execute an electronic signature in the name of a deceased individual is a criminal offense under Korean criminal law.

### 3.2 Mobile Carrier Phone 2FA (*휴대폰 본인인증*) Breakdown

- **Verification Mechanism**: The user inputs carrier, mobile number, full Latin name (`MAHADI MONOAR HOSSAIN`), date of birth (`010530`), and gender digit (`7`). The carrier gateway queries the Ministry of Justice immigration database to confirm an active foreign resident status.
- **Post-Mortem Cancellation**: The foreign student's domestic mobile subscription has been disconnected or suspended due to non-payment and visa expiration.
- **Strict String Matching**: Korean telecom databases store foreign names in unspaced Latin capital letters. Any space or character discrepancy between the passport, alien registration card, and telecom contract produces an immediate rejection error (*통신사 명의 불일치*).

### 3.3 Simple Authentication (*간편인증*: Kakao, PASS, Naver, Toss) Breakdown

- **Mechanism**: Relies on carrier-backed device authentication. PASS requires an active Korean mobile subscription; Kakao Pay and Naver require linked Korean bank accounts.
- **Post-Mortem Block**: When an identity check is executed against an ARC record flagged as deceased in the National Police Agency / Immigration database, the authentication gateway terminates the request immediately with error code `ERR_USER_DECEASED` or `일치하는 회원 정보가 없습니다.`

### 3.4 Impracticability of Headless Browser Automation

Headless scraping scripts (Puppeteer, Playwright, Selenium) cannot circumvent this barrier:

8. **Mandatory Security Modules**: DB Insurance portals enforce server-side checks requiring Hancom AnySign4PC and nProtect Netizen binary execution. Unauthenticated headless browsers fail security module handshakes.
9. **Dynamic CSRF Encryption**: Form submissions require encrypted hidden parameters (`____csrf___`, `ksbizSig`) that can only be computed by active proprietary cryptographic browser extensions.
10. **No Vehicle-Only Lookup**: Under the Credit Information Use and Protection Act (*신용정보의 이용 및 보호에 관한 법률*), Korean insurers are strictly prohibited from exposing insurance contract details or coverage limits based solely on a vehicle registration number (`28 모 1390`) without authenticated consent of the policyholder or verified legal successors.

**Conclusion**: Digital self-service is fully foreclosed. The surviving heirs must obtain the records through formal written legal process.

## 4. DB INSURANCE CORPORATE METADATA & CLAIMS INTAKE DIRECTORY

## 5. STATUTORY LEGAL FOUNDATION FOR OFFLINE DISCLOSURE

The surviving heirs' written demand rests upon four pillars of Korean statutory and private international law:

### 5.1 Article 28 of the Financial Consumer Protection Act (*금융소비자보호법 제 28 조*)

Article 28 (Right to Request Inspection of Materials / *자료열람요구권*) establishes that:

11. **Right to Inspect and Receive Copies**: Financial consumers and their legal successors have the statutory right to request inspection and copies of contracts, transaction records, premium payment ledgers, and claim adjustment documents maintained by financial institutions to protect their legal rights or resolve disputes.
12. **Mandatory 8-Day Compliance**: Upon receiving a written inspection request, the insurer **must comply within 8 calendar days** (or provide justifiable reasons for delay within that window).
13. **Strict Administrative Sanctions**: Under Article 57 of the Act, an insurer that refuses or obstructs inspection without legitimate statutory justification is subject to administrative fines of up to **KRW 30,000,000**.

### 5.2 Articles 638 & 640 of the Korean Commercial Code (*상법 제 638 조 및 제 640 조*)

- **Article 638 (Insurance Contract)**: Binds the insurer to perform contractual covenants upon the occurrence of specified contingent events.
- **Article 640 (Delivery of Policy Document / *보험증권의 교부의무*)**: Explicitly mandates that "an insurer shall, without delay upon the execution of an insurance contract, prepare and deliver an insurance policy document to the policyholder." Furthermore, in the event of loss or destruction of the policy document, the policyholder or their successor has the right to demand reissuance at the insurer's expense.

### 5.3 Article 1005 of the Korean Civil Act (*민법 제 1005 조*)

Under Civil Act Article 1005 (Inheritance and Comprehensive Succession of Rights and Duties), statutory heirs succeed comprehensively to all property rights, contractual claims, procedural remedies, and disclosure entitlements possessed by the deceased policyholder from the moment of death.

### 5.4 Article 49 of the Private International Law (*국제사법 제 49 조*)

Under ROK Private International Law Article 49, succession is governed by the national law of the deceased. Under Bangladeshi personal law (Succession Act, 1925 / Islamic Succession Rules), the surviving biological parents—**BELAL HOSSAIN (Father)** and **MONOARA BEGUM (Mother)**—are the sole surviving legal heirs entitled to 100% of the deceased's estate and insurance claims.
